

Exercise Total Expense

- You want to calculate the total sum of expenses last year. You are given a sequence of positive integers that ends with -1. You have to display the sum.

- Test case 1 :

Input:

2500 1000 1500 -1

Output:

5000

- Test case 2 :

Input:

-1

Output:

0

WARNING: Hints to the exercise on the next slide

Please try to solve the exercise by yourself first...

Exercise Total Expense Hints

- Declare your integer variables and initialize sum to 0
- Read the first expense
- Use while to loop as long as expense is not -1
 - add expense to sum
 - read the next expense
- Print the sum
